

## REACH Compliance Statement

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use (EC 1907/2006) entered into force on June 1, 2007.

Tekmos supports the aim of REACH in improving the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances. Tekmos meets all applicable REACH requirements, including the latest **201** substances subject to analysis per the REACH Regulation **last updated on July 16, 2019**.

Under REACH, the registration of substances which are used in the manufacturing of articles does not apply to Tekmos operations.

Tekmos products are defined as “articles” in REACH Article 3(3), and do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if they are present in a concentration limit above 0.1% on an article level. Tekmos products do not contain any of the currently listed SVHC’s, and Tekmos will work with suppliers to ensure that any SVHC findings would be notified to the European Chemicals Agency as necessary to comply with REACH requirements.

Tekmos assures its customers that our products are in full compliance with the REACH requirements. Questions regarding our REACH compliance can be addressed through contact as follows:
